Suhail Ahmed Laskar

Bengaluru, India | +91-7002544062 | suhaillaskar69@gmail.com | linkedin.com/in/suhailahmedlaskar

PROFESSIONAL SUMMARY

Software Engineer with experience in full-stack development, data analytics, and machine learning. Built an AI-powered healthcare analytics platform processing 5,000+ patient records and a web examination portal serving 1,000+ concurrent users. Results include a 60% reduction in manual reporting time, a 35% improvement in site performance, and a 92% accurate CNN model. Skilled in Python, SQL, JavaScript, PHP, Power BI, TensorFlow, and MongoDB.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL (MySQL, SQL Server, Oracle), C++, PHP, JavaScript, HTML5, CSS3
- **Frameworks and Libraries:** TensorFlow, Pandas, NumPy, OpenCV, Scikit-learn, Flask, RESTful APIs
- **Data and Analytics:** Power BI, Excel (VBA, Advanced Formulas), Statistical Analysis, ETL, Data Wrangling, Data Visualization
- **Machine Learning:** Deep Learning, Convolutional Neural Networks (CNNs), Computer Vision, OCR, Supervised Learning, Unsupervised Learning, Transfer Learning
- **Cloud and Databases:** Oracle Cloud Infrastructure (OCI), MongoDB, MySQL, Database Design
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook, Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Web Developer Intern | Zhagaram Technologies (via EdiGlobe) | Bengaluru, Karnataka, India | Feb 2024 – Jun 2024

- Built an AI-powered healthcare analytics platform processing 5,000+ patient records, with interactive Power BI dashboards tracking patient visits, treatment outcomes, and recovery trends
- Developed and deployed a full-stack examination portal in PHP, MySQL, and JavaScript serving 1,000+ concurrent users, with real-time quizzes, automated grading, and secure authentication
- Automated data processing with Python and MongoDB aggregation pipelines, reducing manual reporting time by 60% and raising data accuracy to 99% through scripted validation
- Enhanced existing software using HTML5, CSS3, JavaScript, and PHP, improving site performance by 35%
- Collaborated with cross-functional teams in an Agile environment to deliver 4+ production-ready projects on schedule, with technical documentation maintained throughout the SDLC

TECHNICAL PROJECTS

Personalized Food Recommendation System | Python, Computer Vision, OCR, Machine Learning, MongoDB | Jan 2025

- Built an AI-powered system using computer vision and OCR to extract nutritional information from packaged food labels
- Implemented a machine learning recommendation engine that analyzes user health profiles, allergens, and dietary restrictions to suggest suitable food choices
- Designed a scalable MongoDB architecture for storing and retrieving product information, user preferences, and nutritional data with real-time queries

Medicinal Plant Detection System | Python, TensorFlow, OpenCV, CNNs, Deep Learning | 2024

- Developed a CNN-based deep learning classifier that identifies medicinal plants from leaf images, achieving 92% accuracy across 50+ species
- Applied OpenCV preprocessing to improve model robustness across varying lighting conditions and image quality
- Trained the model on a custom dataset of 10,000+ leaf images using transfer learning, data augmentation, and hyperparameter tuning

Healthcare Analytics Dashboard | Python, Power BI, Excel VBA, MySQL | 2024

- Collected, cleaned, and analyzed 5,000+ patient health records using Python (Pandas, NumPy) to support healthcare decision-making and resource optimization
- Built interactive Power BI dashboards with drill-down views of patient visits, treatment outcomes, recovery trends, and resource utilization
- Automated report generation with Python and Excel VBA, cutting processing time from 4 hours to 30 minutes while maintaining 99% data accuracy through validation scripts

EDUCATION

Bachelor of Technology, Computer Science and Engineering | Regional Institute of Science and Technology, Meghalaya, India | 2021 – 2025

Higher Secondary (Science) | Surendra Memorial Junior College, Silchar, India | 2021

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Certification: cloud computing fundamentals, infrastructure management, deployment
- Web Development Certification, EdiGlobe and Zhagaram Technologies: full-stack development, modern frameworks
- Deloitte Australia, Cyber Security Job Simulation: threat analysis, risk assessment, security protocols
- Tata, GenAI-Powered Data Analytics Job Simulation: generative AI for data analytics and business intelligence
- Deloitte Australia, Data Analytics Job Simulation: data analysis, visualization, actionable insights

KEY ACHIEVEMENTS

- Delivered 4+ production-ready projects across healthcare analytics, AI/ML, and web development during internship
- Improved data processing efficiency by 60% through automation and optimized workflows
- Built end-to-end solutions from requirement analysis to deployment across the full SDLC
