

SUHAIL AHMED LASKAR

+91-7002544062 | suhaillaskar69@gmail.com | linkedin.com/in/suhailahmedlaskar | Bengaluru, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer with proven expertise in full-stack development, data analytics, and machine learning. Demonstrated ability to build scalable AI-powered solutions processing 5,000+ health records and serving 1,000+ users. Strong foundation in Python, SQL, cloud technologies, and modern web frameworks with measurable impact: 60% efficiency improvement in data processing, 35% enhancement in site performance, and 92% accuracy in ML models. Seeking to leverage technical skills and analytical mindset at Google to develop innovative solutions at scale.

EDUCATION

Regional Institute of Science and Technology <i>Bachelor of Technology in Computer Science and Engineering</i>	Meghalaya, India 2021 – 2025
Higher Secondary (Science) <i>Surendra Memorial Junior College</i>	Silchar, India 2021

TECHNICAL SKILLS

Languages: Python, SQL (MySQL, SQL Server, Oracle), C++, PHP, JavaScript, HTML5, CSS3
Frameworks & Libraries: TensorFlow, Pandas, NumPy, OpenCV, Scikit-learn, Flask, RESTful APIs
Data & Analytics: Power BI, Excel (VBA, Advanced Formulas), Statistical Analysis, ETL, Data Wrangling
Machine Learning: Deep Learning (CNNs), Computer Vision, OCR, Supervised/Unsupervised Learning, Transfer Learning
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Agile/Scrum
Cloud & Databases: Oracle Cloud Infrastructure (OCI), MongoDB, MySQL, Database Design

PROFESSIONAL EXPERIENCE

Web Developer Intern <i>Zhagaram Technologies (via Ediglobe)</i>	Feb 2024 – Jun 2024 <i>Bengaluru, Karnataka, India</i>
- Engineered AI-powered healthcare analytics platform processing 5,000+ patient records, building interactive Power BI dashboards that tracked KPIs including patient visits, treatment outcomes, and recovery trends for data-driven healthcare decisions - Developed and deployed full-stack examination portal using PHP, MySQL, JavaScript serving 1,000+ concurrent users with real-time quiz functionality, automated grading system, and secure authentication mechanisms - Automated data processing workflows using Python and MongoDB aggregation pipelines, achieving 60% reduction in manual reporting time while improving data accuracy to 99% through scripted validation - Enhanced existing software systems with modern web technologies (HTML5, CSS3, JavaScript, PHP), delivering 35% improvement in site performance and user experience metrics - Collaborated with cross-functional teams in Agile environment to deliver 4+ production-ready projects on schedule, maintaining comprehensive technical documentation throughout SDLC	

TECHNICAL PROJECTS

Personalized Food Recommendation System <i>Python, Computer Vision, OCR, ML, MongoDB</i>	Jan 2025
- Built AI-powered system leveraging computer vision and OCR to extract nutritional information from packaged food labels, processing product data at scale for personalized recommendations - Implemented ML recommendation engine analyzing user health profiles, allergen information, and dietary restrictions to suggest optimal food choices based on nutritional requirements - Designed scalable MongoDB architecture for efficient storage and retrieval of product information, user preferences, and nutritional databases supporting real-time queries	
Medicinal Plant Detection System <i>Python, TensorFlow, OpenCV, CNNs, Deep Learning</i>	2024
- Developed deep learning classification system identifying medicinal plants from leaf images using CNNs, achieving 92% accuracy across 50+ species for agricultural and pharmaceutical applications - Applied computer vision techniques and OpenCV preprocessing to enhance model robustness across varying lighting conditions and image qualities, improving real-world deployment viability - Trained model on custom dataset of 10,000+ leaf images using transfer learning and data augmentation, optimizing performance through hyperparameter tuning and model architecture refinement	

Healthcare Analytics Dashboard | *Python, Power BI, Excel VBA, MySQL*2024

- Collected, cleaned, and analyzed **5,000+** **patient health records** using Python (Pandas, NumPy) to derive actionable insights supporting healthcare decision-making and resource optimization
- Built interactive dashboards in Power BI tracking critical health KPIs including patient visits, treatment outcomes, recovery trends, and resource utilization with drill-down capabilities
- Automated report generation using Python and Excel VBA, reducing processing time from **4 hours to 30 minutes** while ensuring 99% data accuracy through validation scripts

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Oracle Cloud Infrastructure (OCI) Certification – Cloud computing fundamentals, infrastructure management, deployment

Web Development Certification – Ediglobe & Zhagaram Technologies – Full-stack development, modern frameworks

Deloitte Australia - Cyber Security Job Simulation – Threat analysis, risk assessment, security protocols

Tata - GenAI Powered Data Analytics Job Simulation – Generative AI for data analytics and BI applications

Deloitte Australia - Data Analytics Job Simulation – Data analysis, visualization, actionable insights

KEY ACHIEVEMENTS

Delivered **4+** **production-ready projects** spanning healthcare analytics, AI/ML, and web development during internship

Achieved **60% improvement in data processing efficiency** through automation and optimized workflows

Completed **5 industry-recognized certifications** from Oracle, Deloitte, and Tata within 12 months

Developed end-to-end solutions from requirement analysis to deployment, demonstrating full SDLC expertise
